Overview

“Hil Gurlushyk” is your partner in the industrial projects with extensive experience in the areas of construction, transportation and specialized equipment rental with the view of entering petroleum and marine services as independent player.

When it comes to undertaking big projects, we are among the heavy weights, safe and reliable.

Our portfolio grew over the time and we now have years in our expertise in provision heavy and specialized equipment to petroleum companies and dynamically moving forward diversifying the services scope.

We are changing gears from supporting to directly engaging in the petroleum operations with focus on the offshore operations.

We are breaking into the marine industry with our capacities that we are proud to bring onboard with us.

In our work, we strive to excel in meeting international standards, and HSE is on top of our priorities in operations.

We like doing things on a big scale and what we offer with this to our clients is professional project management, implementation of solutions intelligently.

Vision

A company of choice for solutions across petroleum and marine industry of Turkmenistan.

Mission

We operate in Petroleum and Marine Industries.
We provide top professional services.
We constantly evolve and excel in what we do.
We contribute to economy.

Objectives

Expand our business to new horizons.
Conduct safe and reliable operations.
Develop the team to meet new challenges.
Minimize risks for partners and clients.

Core competence

Specialized equipment

We contribute to the petroleum operations of our clients and implement jobs using our impressive fleet of cranes, bulldozers, tractor trucks and other specialized equipment.

We have no credit for mistakes as offshore operations in the Caspian are known for challenging weather requiring sound and responsible approach. This is what they find in our company.

Logistics and transportation

Transportation of cargoes related to the petroleum operations might at times be a daunting task.

We are known as a professional who can deliver the task with utmost safety and care. We understand the pressure of time and money when it comes to supporting offshore jobs.

Marine Services

Offshore operations require strictly professional approach as stakes are high.

This brings to attention aspects of technical suitability and HSE. This is where we come with big potential and the team of experts managing the assets.

Experience in construction

For the period of 2011 – 2018 our company has preformed following construction and installation works:

- ✓ Residential Multistory House in Ashgabat
- ✓ Residential Villas, 5 units in Ashgabat
- ✓ Commercial Multistory unit in Ashgabat
- ✓ Boarding school in Mary
- ✓ Hippodrome in Dashoguz
- ✓ CO₂ factory and Restaurant in Yashlyk
- ✓ Potato Chips factory in Ashgabat
- ✓ Café – Bar in Ashgabat

Experience in construction

Construction of 4 floored Residential House

Client:

Union of Industrialists and
Entrepreneurs of Turkmenistan

Period of construction:

July 2014 – July 2016

Total No

of constructed units: 1

Apartments type:

2 rooms – 98,55 m²

3 rooms – 128,88 m²

4 rooms – 154,49 m²

Experience in construction

Construction of residential villas

Client:

Union of Industrialists and
Entrepreneurs of Turkmenistan

Period of construction:

May 2015 – December 2016

Total No

of constructed units: 5

Total area

of single villa: 684,60 m²

Experience in construction

Construction of commercial multistory office units

Client:

Economic Society Hil Gurlușyk

Period of construction:

June 2016 – December 2017

Total No

of constructed units: 1

Accomplished works:

- ✓ Concrete sidewalk

Entering marine business

Manpower supply for A&D works

“Hil Gurlushyk” provides manpower supply services to the Dragon Oil Turkmenistan Limited for the purpose of carrying on dismantling works of an offshore platform.

Operations carried out from our operations base in Hazar and all team members (starting from Supervisors and Managers to operators and laborers) are qualified and experienced professionals in the field of provision of offshore services.

Brief overview of the Project:

We execute works in safe and efficient manner from Old depleted platforms deploying skilled manpower.

Preparing required documents such as method statements and keeping manpower timesheets and preparing necessary reports for tracking quantity and type of scrap removed.

Entering marine business

Crane Barge “HIL EDERMAN”

“Hil Gurlushyk is absolutely ready to bring professional expertise and extensive knowledge of the marine market to the benefit of the clients and partners.

Team of highly experienced managers is at a starting line to actively engage into marine operations for offshore petroleum companies. This is supported by trust and appreciation of the excellent work demonstrated to our clients in other service fields.

“Hil Gurlushyk” look forward to engage into the operations with Crane Barge “HIL EDERMAN” given such opportunity comes up from one of the largest offshore petroleum operator in Turkmenistan.

The Crane Barge “HIL EDERMAN” is in top technical condition supported by all international standards and certifications.

Entering marine business

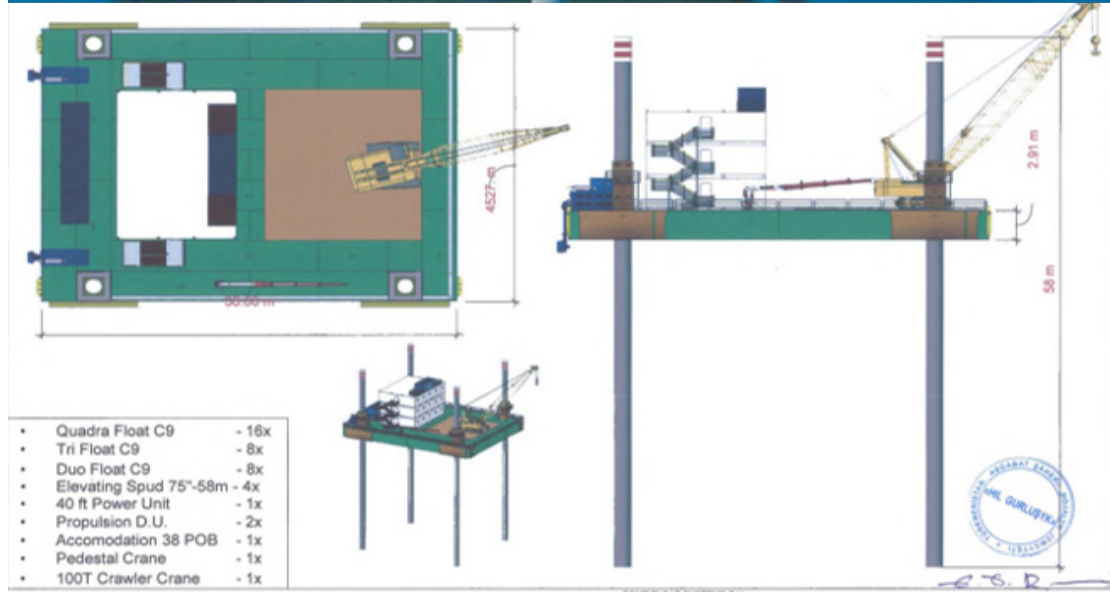

COMBIFLOAT C-9.5 “HIL DENIZ”

Another of “Hil Gurlushyk’s” bids in the same tender is for doing the job in Turkmenistan with the self-elevating platform “HIL DENIZ”.

“HIL DENIZ” comes in handy as the potential client has large scale operations offshore and plant to expand drilling operations.

“HIL DENIZ” will be changed in design to suit the needs of a client.

All preparatory work has been done and “HIL DENIZ” is going to become operational at a fast pace at call.

- Quadra Float C9 - 16x
- Tri Float C9 - 8x
- Duo Float C9 - 8x
- Elevating Spud 75"-58m - 4x
- 40 ft Power Unit - 1x
- Propulsion D.U. - 2x
- Accomodation 38 POB - 1x
- Pedestal Crane - 1x
- 100T Crawler Crane - 1x

Entering marine business

Jack-up Barge

“Hil Gurlushyk’s” last but not the least from the same bid is a self-propelled Jack-up barge.

We entered into agreement with one of the international leaders in Ship Design & Engineering, Germany’s Neptune who will design and construct specialized self-propelled Jack-up barge from initial design Phase 1A up to the latest construction design Phase 2B.

Subsequently the barge is going to be constructed in shipyard of Keppel of Baku.

We did our homework and undertook all steps to come quick at first call and get this unit built and made operational upon award of the contract.

Warehousing and storage

“Hil Gurlushyk” operates from newly build office premises sufficient to cover any operational needs.

Our office is complete with the integrated complex of buildings.

We are leader in providing services for the storage of specific and oversized goods and equipment in the warehouse.

Clients are sure to receive best services there is in storing cargoes of any type and size. Conditions in our warehouse not only allow to store heavy goods for petroleum operations but also temperature and light sensitive special materials and equipment. Let alone any general cargo there may be.

Total warehouse space is 2000 square meters with closed storage boxes for general cargo and foods (c/w freezers and chillers).

The warehouse can also accommodate chemical goods.

Warehousing and storage

Layout of the warehouse complex of buildings

Our advantages

“Hil Gurlushyk” owns all assets and guarantees performance.

“Hil Gurlushyk” has extensive experience in provision of complete range of services to cover operational needs of companies engaged in petroleum operations, offshore and onshore, in these fields:

Transportation
and logistics

Warehousing
cargoes
of any size

Capacity to start provision
of marine services with the
ready team of professionals

Future

“Hil Gurlushyk”
has a clear and precise strategy:

We come to expand in the oil and gas area.

Our company is consistently and steadily develops new services to the oil and gas industry.

We are shifting our focus to the oil and gas industry and taking opportunities coming our way.

We are confident that with our team of professionals and technical and financial capabilities we can achieve any goals set.

“Hil Gurlushyk” is actively offering new services to leading international oil and gas companies.

We participate in bids for the services called for by such companies operating offshore and onshore under Production Sharing Agreements. In recent instance, we have bid for jobs with Dragon Oil and Petronas in Turkmenistan.

One of the operations we are ready to provide in this regard is the service of the specialized offshore multirole Lift Boats and Heavy Lifting Crane Vessels. These assets are going to be owned by “Hil Gurlushyk”.

Potential

“Hil Gurlushyk” has strategic outlook and clear targets in business development. Existing petroleum companies in Turkmenistan operating offshore constantly increase production output even when the oil price is low.

This is due to vast reserves of oil and gas that account Turkmenistan to be the fourth largest holder of gas deposits.

Big international companies are operating offshore under Production Sharing Agreements: Petronas and Dragon Oil. Italian ENI operates in the onshore block also under the Production Sharing Agreement.

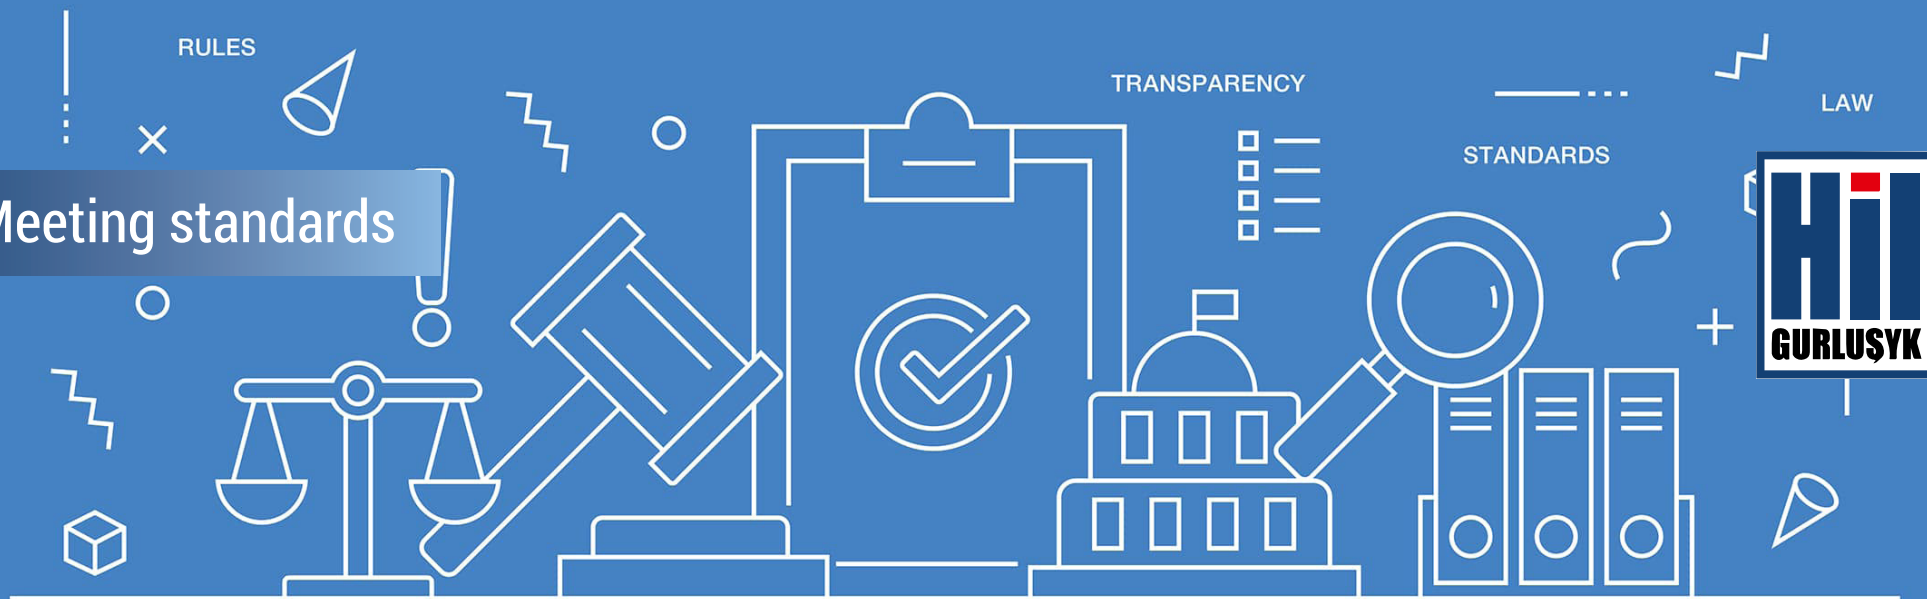

“Hil Gurlushyk” sees and appreciates potential that this presents in terms of business opportunities.

Turkmenistan has a developed system of gas pipelines that run to China, Russia and Iran. Project linking Turkmenistan and India through Afghanistan and Pakistan have also arrived at practical realization.

Chinese CNPC operates in the Right Bank of Amudarya developing gas fields there.

This is where opportunities for “Hil Gurlushyk” appear as onshore sector is also holds potential.

Meeting standards

“Hil Gurlushyk” strives to meet the highest international standards set for the petroleum and marine industries. This is not only intention but practical job that we are doing.

We have successfully completed first stage audit under ISO standards by IACS member Class Society Bureau Veritas for activities of the company in order to obtain a Certificate for compliance with the requirements of the International Safety Organization:

ISO 9001: 2015

ISO 14001: 2015

OHSAS 18001: 2007

HSE is priority

We, at “Hil Gurlushyk”, treat the lives and well being of people as top priority. We set the highest HSE standards in our operations. HSE is for us practice rather than a simple declaration.

In terms of marine operations, we are going to operate following documented and accredited procedures and highest QHSE standards. These standards will be continuously upgraded in company Safety Management System for the operation and management of required type of vessels under audit of the BV (Bureau Veritas), Class Society for compliance with ISO 9001:2015, ISO 14001:2015 and OHSAS 18001:2015 for the new 2018 year standards forehand although it is going to enter into force this year and get mandatory status.

“Hil Gurlushyk” will always consider Safety and Quality as critical component of all operations. This approach brought a result of ZERO LTI record since the inception of the company. Established system to observe HSE where we not only set the high standards of operational safety and vigilance in all aspects of our operations but also track performance by using KPI system on a monthly basis.

We encourage all personnel to participate in the STOP card system with monthly awards structure that will be implemented in provision of the specialized ships for customer as well.

Operations Team in Hazar

New employees receive induction training when employed. Such trainings are recorded as per applicable state regulations. Any modifications or changes to the HSE components are delivered in the regular HSE meetings and thus all employees are made aware of most recent HSE knowledge.

Managers and other personnel undergo HSE assessment on a regular basis. Results of the assessments are analysed and measures for improvement are developed and implemented to ensure required competence for operations.

Venue for HSE in-house trainings: office of ES "Hil Gurlushyk" in Hazar.

Trainings: Personnel initial HSE familiarization, specialized trainings such as Fire Safety, Rules of the Road, First Aid, Risk Assessment, Manual Handling, Hand Tools Safety, etc.
